JERRY CAN TEST PUMP

HD 10,000 PSI

High Pressure Portable Chemical Injection Hand Pump

The XHP 10000, is a portable chemical injection hand pump capable of injection pressure to a maximum of 10000 psi.

The portable injection hand pump is used to introduce methanol to effectively thaw frozen lines. Other applications may include hydro testing.

The XHP 10000 utilizes a 10000 psi line check to maintain the pump pressure in the process installation. A supplied needle valve is incorporated to relieve the line pressure in the hose.

The hand pump is mounted on a durable 5 gallon (20 L) tank. The 7 foot long injection hose utilizes a swivel fitting to easily install to most applications. The XHP 10000 is field serviceable, and additional support and repair kits are readily available. Contact a **Proline** representative for more information.
