

Hydraulic Cage Clamp

The Hydraulic Cage Clamp produces the extra strength necessary for aligning large pipe diameters. Pipes can be effortlessly aligned due to the design of the Hydraulic Closure Mechanism. The Hydraulic Closure Mechanism also permits the rapid release of the clamp from the pipe. The clamp is available for 16" to 60" / 406 to 1524mm pipe.

Hydraulic Cage Clamps permit rapid pipe alignment and quick release of the clamp from the pipe after welding.

Hydraulic Tack Type Cage Clamp
