

Overview

With intelligent firmware and robust safety features, the *Proline Crawler Motorization Kit* enhances the efficiency and reliability of your pipe cutting system.

Built for professionals who demand control and consistency in every cut.

Engineered for precision speed management in pipe cutting applications, ideal for the oil and gas industry. This powerful controller delivers consistent, uniform cuts that reduce prep time and streamline your workflow, saving both time and money on the job site.

Features

- **Wide Input Range:** Operates on 35–240 VAC or 35–340 VDC
- **Automatic Speed Control:** Compensates for load and voltage variations
- **Real-Time Diagnostics:** Alerts for overloads, short circuits, overheating, and fuse failure
- **Digital Display:** Shows speed, warnings, and detailed run-time metrics
- **Smooth Operation:** Fast directional switching and four adjustable speed curves
- **Enhanced Safety:** Built-in protections and visual fault indicators
- **Precision Tuning:** Lockable speed settings and deviation monitoring
- **External Fuse:** Convenient fuse replacement and added protection beyond internal fuses
